## **Foreword: The Meme Holy War Begins**

Oh, crypto faithful, meme lords, and history buffs. The time has come when the crypto market needs a miracle, a salvation from the boring meme coins. Prepare yourselves for PopeCoin (\$POPE) - the first holy meme coin forged from the historic showdown between an indomitable Pope and a greedy Emperor.

We are not just here to HODL; we are here to make meme history. \$POPE isn't just a token; it's a crusade against boredom, a declaration of war against paper-hands, and a prayer for heavenly gains. Brace yourselves, for the holy meme war has begun. WAGMI!

But that's only the beginning. Our bigger vision? To develop \$POPE into a Layer 2 solution for Bitcoin — making the network faster, more scalable, and much cheaper. It's a smart upgrade for a holy cause.

## **The Dire Problem: Napoleon and the OG Rug Pull**

The year is 1809. The world is shaken. Napoleon Bonaparte, the original degenerate, the self-proclaimed Emperor, executed one of the most audacious rug pulls in history: he kidnapped the freaking Pope Pius VII. Yes, you heard that right. He spread FUD throughout the Vatican, then YOLO'd and abducted the head of the Church just because the Pope wouldn't sign his ridiculous "whitepaper."

The Pope, a true OG diamond hand, was held captive for FIVE long years – longer than the lifespan of 90% of altcoins out there. But did he paper-hand? NO. He HODLed the faith, despite Napoleon's constant pressure. This is the historical "L" (Loss) that we, the \$POPE faithful, will turn into the biggest "W" (Win) of 2025.

# The Divine Solution: \$POPE - The Meme Coin Savior

Tired of meaningless meme coins? Sick of the repetitive dogs and frogs? \$POPE is the answer.

- Meme Coin With Brains: We combine the humor of memes with the depth of history. Get entertained and educated – the perfect combo.
- Absolute Anti-Rug Pull: With liquidity locked tighter than the Pope was back then and transparent tokenomics, \$POPE is designed to resist any Napoleon-style schemes.
- Holy Multi-Chain: ETH, BSC, SOL, BASE – we are everywhere, just like faith. Everyone can join this crusade.
- Based AF Community: We're not just building a token; we're building a congregation of meme lords, crypto believers, and history buffs.

## POPE Layer 2 Vision

As the crypto world evolves, so does \$POPE. Our long-term mission is to expand PopeCoin into a powerful Layer 2 solution for Bitcoin, bringing speed, scalability, and cost-efficiency to the original chain of chains.

While staying true to our meme-driven origins, POPE Layer 2 will provide:

- Scalability: Handle significantly more transactions per second without clogging the Bitcoin mainnet.
- Speed: Near-instant transaction finality for both staking and trading.
- Low Fees: Slash gas costs thanks to off-chain processing and optimized infrastructure.
- Boosted Rewards: Lower operating costs = higher staking yields for early believers.

By building the POPE Layer 2, we're not just memeing — we're engineering a holier blockchain future where history, humor, and utility converge.

Disclaimer:

\$POPE is a meme-based cryptocurrency inspired by historical events. This project is purely satirical and educational in nature. It is not affiliated with, endorsed by, or associated with the Vatican, the Catholic Church, or any religious organization. All references to historical figures and events are used for entertainment and parody purposes only. \$POPE is not an investment vehicle and should not be treated as financial advice.

## Staking: Blessings for the Faithful

At \$POPE, we believe true believers should be rewarded.

The \$POPE staking program is crafted to honor those who join our crusade early. By allocating a dedicated portion of our supply to staking rewards, we ensure that the faithful who support \$POPE from the very beginning are blessed accordingly.

### Why Stake During the Presale?

- Immediate Access: Presale participants can start staking their \$POPE tokens immediately after receiving them.

- **Dynamic Rewards:** Staking rewards are flexible, adjusting based on total tokens staked and individual contributions. Early stakers enjoy higher APYs. As the pool grows, APYs gradually balance, rewarding the earliest and most faithful.
- **Demonstrating Faith:** Staking is not just about rewards — it's a testament to your belief in \$POPE's mission and resilience.

## **How Staking Works**

A dedicated staking pool ensures rewards are fairly distributed to those who lock their tokens in support of the Holy Mission.

- **Rewards** are distributed proportionally based on stake size and timing.
- **Unstaking Tokens:** Staked tokens can be unstaked by believers who wish to unlock their \$POPE holdings. A cooldown period may apply to maintain stability in the staking pool. Remaining staked is highly encouraged to maximize your holy blessings.
- **Claiming Rewards:** Rewards will be distributed alongside the delivery of tokens after the presale concludes. Participants will receive both their purchased tokens and their accumulated staking rewards at the same time.

The specific claiming schedule will be announced after the presale officially ends.

By staking \$POPE, you are not just earning — you are standing at the forefront of meme coin history.

WAGMI — For those who stake with faith and patience.

# Listing

As we complete Phase 2, following the triumphant conclusion of our presale, \$POPE will make its debut on decentralized exchanges (DEXs). This ensures immediate and fair access for our earliest believers. The launch price will align with the final presale stage, set at an issue price of \$0.00014739.

But we are not stopping there. Centralized exchange (CEX) listings are a key pillar of \$POPE's holy expansion. Talks with major CEX platforms are already underway, and we will announce detailed updates as soon as deals are sealed. This dual strategy of DEX + CEX listings will allow both seasoned traders and newcomers to join the congregation with ease.

CEX listings blessed by the meme lords themselves.

By ensuring liquidity, accessibility, and broader exposure, \$POPE aims to take its place not just in crypto markets but in meme coin history.

# Conclusion & Disclaimer

\$POPE is a meme coin created for entertainment and community building, based on a unique historical narrative. While we believe in the potential of \$POPE and the support of our community, investing in cryptocurrencies, especially meme coins, carries high risks.

This is NOT financial advice. Always conduct your own research (DYOR), assess your risk tolerance, and only invest money you can afford to lose. We are not responsible for any financial losses.

But hey, if the Pope could survive being kidnapped by Napoleon, maybe your portfolio can survive this market with a little \$POPE, right.

Join us. Buy \$POPE. And let's write the next chapter of meme history together.
